

A large coil of blue and silver braided cable, likely for industrial or marine use. The text 'AMANTATO' and 'ZZATO' is overlaid in large, bold, blue letters with a white outline. A small inset image in the bottom left corner shows a close-up of the cable's braided structure.

Diamond sintered wire is a high-cutting speed wire and it also offers good performances. It's also produced in SEA 3D version (with positioned diamond), which guarantees 5% increase in performances and 25% increase in speed, if compared to traditional sin-tered wires.
